Product Lifecycle and Supply Chain Management

Executive Education | School of Management

YOUR CAREER: GET THE BIG PICTURE

Customers demand products and services that are fulfilled through supply chains. This cycle of value creation accounts for almost all business transactions. An executive with a holistic, end-to-end perspective will maximize their contribution to any business, as well as their ongoing career prospects.

In today's fast paced business environment, it is crucial for executives to make decisions from an informed workplace. The Product Lifecycle and Supply Chain Management program at the University of Texas at Dallas will provide you with the skills and practical approach to business to connect all of the dots. From customer requirements to product design to production, marketing to service, distribution to disposal, each step in the product lifecycle and supply chain impact one another. It is the executive that understands "the big picture" that is the most valuable. Are you ready to unlock your full potential?
